

solar digits

Don't leave your house number in the dark.

Numerals from 0-9 plus the letters A & B all powered by the Australian sun.

In addition there are single, double and triple wall mount brackets to cater for one, two or three house numbers. The unique designed wall mount is made from aluminium for light weight and weather resistant, capped by two plastic sleeves which drill into the solar digits to be fixed into place. The wall mounts can be drilled into timber or brick depending on your fence or gate materials.

Not only does it make a house number stand out, or pizza deliveries easy, the illuminating light helps emergency services during the night. During the day, the digits are still clearly visible and contemporary in their design.

The TriEco Solar Digits are a 100% Australian designed and patented product.

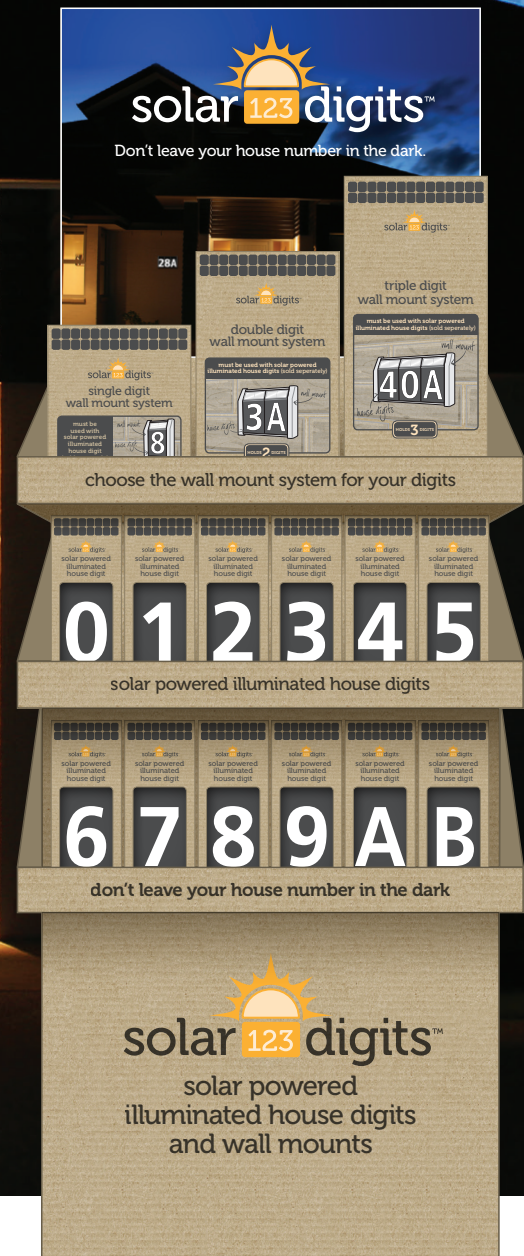

28A

easily locate your house number at night

unique point of sale unit

solar digits features:
